| <p>I'm enrolled in a course, but it doesn't show up for me when I log into Blackboard. Why?</p> | <p>There two common reasons for this.</p> <ol style="list-style-type: none"> 1. (Most common) The instructor has not made the course available to students yet. Typically, this is done about 1 week prior to the first day of class. If you login to SIS and see the course in your list of registered courses, then this reason is most likely. 2. There may be a billing problem or other issue with your student account. If you registered for courses, but no longer see them in SIS, this may be the reason. Contact the Student Accounts office if you suspect this to be the case. http://nursing.jhu.edu/about-us/contact/directory/student-accounts.html <p>If neither of the above situations apply, contact the SON Help Desk to report the issue.</p> |
