

Installing Windows Updates

Description

Each month Microsoft releases updates which are delivered and installed using Windows Update. If you have been asked to install updates on your computer you can follow the steps below.

Install Updates on Microsoft Windows 7

<p>Step 1. Open Windows Update by clicking the Start button . In the search box, type Update, and then, in the list of results, click Windows Update.</p> 	<p>Step 2. If prompted to "Restart your computer to install important updates", press the Restart now button. Start over at step 1 to make certain all available updates have been installed.</p> 	<p>Step 3. In the Windows Update window, click Check for updates while Windows is online.</p> 
<p>Step 4. If prompted to "Install updates for your computer", press the Install updates button, and then wait while updates are installed.</p> 	<p>Step 5. If prompted to "Restart now to finish installing", press the Restart now button.</p> 	<p>Step 6. Stay in step 4.</p>
